

CSC 102 ♦ HOW THE INTERNET WORKS  
ASSIGNMENT 4

## HTML Forms Practice

---

**PART #1 :** Prepare a web page with the contacts form

The image shows a contact form with the following elements:

- A label "Name:" followed by a single-line text input box.
- A label "E-mail:" followed by a single-line text input box.
- A label "Message:" followed by a multi-line text area.
- A submit button labeled "Send your message".

Put 2 text boxes and a text area (multi line text box) and finally a submit button and their labels as displayed in above picture.

Set the action of the form to send you an email when clicked to the submit button.

**PART #2:** Prepare a registration form. You can go beyond but minimum requirements of the form are:

- A popup menu with the list of states (put at least 5 states to demonstrate you can add)
- A checkbox to get smoking status (smoking, not smoking)
- A text box for the name
- An option box (radio button) for the marital status ( like married, single, decline to state)
- Finally a submit button and a clear button (just put a button with type="reset", to clean the content of form)
